Policy

Quality, Environment & Work Environment

- Jobro Sheet Metal Technology AB shall offer the customer a complete solution through to the finished product, which meets or preferably exceeds our customers' needs.
- Our design, tool and sheet metal production shall be based on competence, flexibility, short lead times and environmental awareness.
- All personnel shall be involved in our improvement work by improving the use of our resources, continuously working to reduce environmental impact and to prevent pollution.
- We shall manufacture our products using modern machines that are energy efficient, have minimal noise impact and emit the least possible emissions of oils and gases.
- All work shall be carried out in safe conditions by well-trained and motivated personnel.
- We shall increase knowledge and raise awareness of quality, environment and work environment issues among our employees.
- We shall comply with government environmental and legal requirements.

Ulf Wilhelmsson (CEO)
